

Git 07

Git Merge and Rebase:

Git Merge does not maintain previous history after merging . Just it creates a new commit and does not maintain history

Rebase maintains previous history using a hash symbol and

Git Merge concept:

```
$ git commit
```

```
$ git checkout -b haseeb
```

```
$ git commit
```

```
$ git commit
```

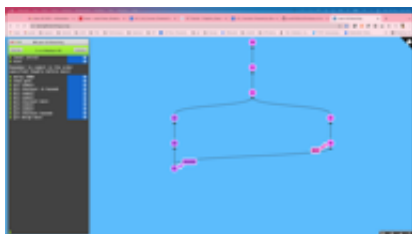

```
$ git checkout main
```

```
$ git commit
```

```
$ git commit
```

```
$ git checkout haseeb
```

```
$ git merge main
```

Git rebase Concept :

```
$ git commit
```

```
$ git commit
```

```
$ git checkout -b haseeb
```

\$ git commit

\$ git commit

\$ git checkout main

\$ git commit

\$ git commit

\$ git checkout haseeb

\$ git commit

\$ git commit

\$ git checkout main

\$ git rebase haseeb
