Git Cherry-pick

Master - c1 c2 c3

Local feature branch - f1 f2 f3 f4

Master - c1 c2 c3 f2 f3

Local feature branch - f1 f2 f3 f4

On picking specific commit and merging with main branch or vice versa due to hot fix or any other reason is called cherry pick

22bb0cc (HEAD -> localJava, origin/localJava) first cherry pick

bfd72e2 (HEAD -> localJava, origin/localJava) second cherry pick

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git cherry-pick 22bb0cc

Auto-merging src/expressionStatementMethods/decimalNumberCountGit.java

[master 4206dbf] first cherry pick

Date: Sun Dec 19 21:45:43 2021 +0530

Git Stash

When there is conflict in your local branch and master branch - files that you are pulling from master is same with your local branch

When pulling we get message as "files would be overwritten by merge"

To resolve this:

We can stash our local branch changes first and save in git by providing a name - so that the local changes in local branch does not appear

Thereafter we can pull the changes from the master without any

error:

Stash commands:

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git stash
No local changes to save

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git add .
We need to first add then perform the stash command

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git stash
Saved working directory and index state WIP on localJava:
bfd72e2 second cherry pick

After performing stash then pull from origin master
mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git pull origin master

From <https://github.com/mdhaseebpes/java0209>

* branch master -> FETCH_HEAD

Auto-merging src/expressionStatementMethods/decimalNumberCountGit.java
CONFLICT (content): Merge conflict in src/expressionStatementMethods/
decimalNumberCountGit.java

Automatic merge failed; fix conflicts and then commit the result.

In order pull back your local changes - bfd72e2 and merge with local branch we need to use — stash pop
When we do stash pop we could get merge conflicts as previously stash we were working on same files:

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git stash pop

CONFLICT (add/add): Merge conflict in src/
expressionStatementMethods/StashMergeConflictGit.java

Auto-merging src/expressionStatementMethods/StashMergeConflictGit.java
The stash entry is kept in case you need it again.

Then from IntelliJ we need to check which changes to keep and

manually remove the code

After resolving the conflicts commit the changes and continue with the work

```
mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan
JavaLearn % git add .
mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan
JavaLearn % git status
On branch localJava
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    modified:   src/expressionStatementMethods/StashMergeConflictGit.java
```

mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git commit -m "resolved conflict"

```
[localJava 5f23b83] resolved conflict
1 file changed, 5 insertions(+), 2 deletions(-)
mohammedhaseebalikhan@271AMBBLR-Mohammed-Haseeb-Ali-Khan JavaLearn % git push origin localJava
